 Notice of References Cited (PTO-892) Notice of Draftsperson's Patent Drawing Review (PTO-948) Information Disclosure Statement(s) (PTO-1449) Paper No(s) 	5) Notice of	v Summary (PTO-413) Paper No(s) f Informal Patent Application (PTO-152)				

U.S. Patent and Trademark Office PTO-326 (Rev. 04-01)

Application/Control Number: 10/060,394

Art Unit: 1755

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

The disclosure is objected to because of the following informalities: All occurrences of "alkali earth" should be "alkaline earth". Appropriate correction is required.

Claims 1, 2 and 8 are objected to because of the following informalities: All occurrences of "alkali earth" should be "alkaline earth". Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Gwak et al.

This reference teaches a low voltage red phosphor comprising a MTiO₃ matrix and the doping agents M', Zn and M'', where M is Mg, Ba, Sr or Ca, M' is Al, Ga, In or Tl and M'' is Pr, Eu, Tb, Er, Ce or Tm. Te amount of Zn is 0.01-15 mol%, the amount of M'' is 0.05-5 mol% and the amount of M' is 0.5-80 mol%. These amounts fall within or are the claimed ranges. The reference teaches the claimed phosphor.

Application/Control Number: 10/060,394

Art Unit: 1755

Claim 8 would be allowable if rewritten or amended to overcome the objection set forth in this Office action.

Claim 9 is objected to as being dependent upon an objected base claim and will be allowable once the objection in claim 8 is corrected.

The claimed process is not taught or suggested by the cited art of record. Gwak et al teaches forming the phosphor by firing a mixture of a zinc compound and MTiO₃:M', M", where M, M' and M" has the above definitions. There is no suggestion in the art that MTiO₃:M', M" can be prepared in situ during the step of firing with the zinc compound.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melissa Koslow whose telephone number is (703) 308-3817. The examiner can normally be reached on Monday-Friday from 8:00 AM to 3:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Bell, can be reached at (703) 308-3823.

The fax number for Amendments filed under 37 CFR 1.116 or After Final communications is (703) 872-9311. The fax number for all other official communications is (703) 872-9310.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0661 or (703) 308-0662.
